

Unlimited 5G Wireless

Enterprise Connectivity Without Constraints

Break Free From Data Caps.

Scale With Confidence. Operate Without Surprises.

Today's businesses run on data: video, cloud applications, IoT devices, remote work, and always-on operations. Traditional wireless plans with usage limits and unpredictable overage fees create friction, risk, and hesitation.

EPIC iO Unlimited 5G Wireless removes those barriers, delivering enterprise-grade 5G connectivity with unlimited data, predictable pricing, and full operational control.

This is wireless built to be primary, not just backup.

WHY UNLIMITED 5G MATTERS FOR BUSINESS

Unlimited 5G isn't about consuming more data, it's about removing operational friction.

When businesses no longer have to monitor every gigabyte, they can:

- Deploy faster
- Innovate without constraints
- Standardize connectivity across locations
- Confidently support data-heavy applications

Unlimited changes the conversation from "Can we afford this?" to "How fast can we scale?"

Unlimited 5G Benefits

Predictable Costs

- Fixed monthly pricing
- No data overages
- No usage-based surprises
- Simplified budgeting across sites.

Always-On Performance

- High-speed, low-latency 5G connectivity
- Designed for business-critical applications
- Ideal for video, cloud apps, AIoT, and edge computing

Proven Performance

In real-world deployments, EPIC iO has seen 5G speeds of up to **1 Gbps download** and **200 Mbps upload**, depending on location, carrier, and network conditions.

Faster Deployment

- No trenching, permits, or construction delays
- Rapid site turn-ups
- Perfect for temporary, mobile, or hard-to-reach locations

Operational Flexibility

- Support primary internet, failover, or hybrid WAN models
- Scale up locations without renegotiating contracts
- Enable standardization across multi-site environments

WHERE UNLIMITED 5G EXCELS

Unlimited 5G is ideal for organizations that rely on consistent, high-volume data usage, including:

Multi-location enterprises

Retail & quick-serve restaurant chains

Construction & temporary job sites

Warehouses & logistics hubs

Manufacturing & industrial environments

Smart infrastructure & AIoT deployments

Healthcare clinics & remote facilities

WHY EPIC IO FOR UNLIMITED 5G

Unlimited data is only valuable when it's managed, supported, and engineered correctly.

EPIC iO delivers more than connectivity, we deliver confidence.

Enterprise-First Network Design

- Carrier-grade infrastructure
- Hardware certified and optimized for 5G performance
- Designed for uptime, redundancy, and scale

Wireless as Primary Expertise

- Purpose-built architectures for replacing or augmenting wired circuits
- Real-world experience supporting primary WAN over 5G
- Proven performance for mission-critical environments

Full Visibility & Cost Control

- Centralized monitoring and usage visibility
- Proactive performance management
- Tools designed to remove the traditional fear of wireless cost overruns

White-Glove Implementation

- Network design and deployment support
- Hardware provisioning and activation
- Ongoing lifecycle management

UNLIMITED DATA. REAL CONTROL. ENTERPRISE RESULTS.

This is enterprise unlimited—done right.
