

Who is EPIC iO?

EPIC iO strives to make organizations and communities safer, smarter, and more connected through our powerful portfolio of Connectivity and AI + IoT solutions.

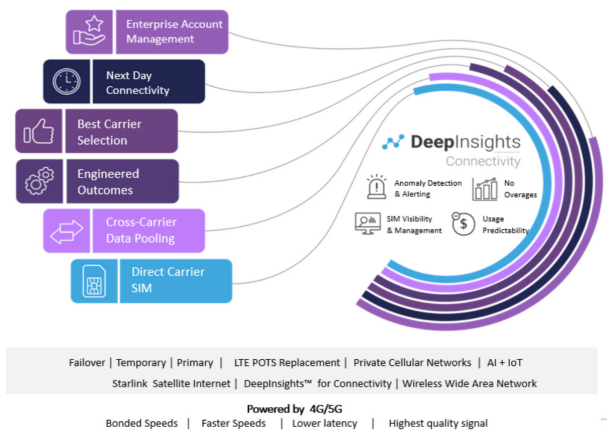

With over 20 years of experience, we have developed unmatched industry expertise and a diverse profile to give you a solution that is efficient, easy to use, and provides actionable data. These solutions span multiple industries, including, retail, education, hospitality, public works, manufacturing, construction, law enforcement, and more. Our solutions are all backed by our expert engineers, installers, programmers, and customer success agents.

EPIC iO's Portfolio

Connectivity

We have relied upon our Gold Standard to deliver top-tier customer experience through rapid deployment, personalized carrier selection to ensure the best carrier every time for every location, the utilization of dual SIMS for every deployment, a specialized Data Management team to prevent overages and unexpected costs, cross-carrier data Pooling, and \$0 CapEX Options.

AI + IoT

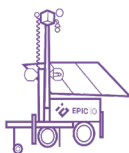

EPIC iO's portfolio of AI and IoT (AIoT) solutions powered by our 4G/5G connectivity enables you to join the next generation of smart organizations by solving everyday challenges including security, safety compliance, environmental monitoring, asset monitoring and tracking, public safety, public transportation, smart city innovation, cold storage, and more. These solutions span across multiple industries including healthcare, critical infrastructure, retail, education, hospitality, public works, construction, and law enforcement. All of which can be monitored in a single pane of glass through our DeepInsights™ platform that combines and manages thousands of IoT devices and camera data for new and existing applications making this information easily accessible and digestible.

DeepInsights

Our AI and IoT solutions are managed through DeepInsights™. DeepInsights™ combines and manages thousands of IoT devices and camera data with our AI and IoT solutions to provide information that is centrally managed and actionable.

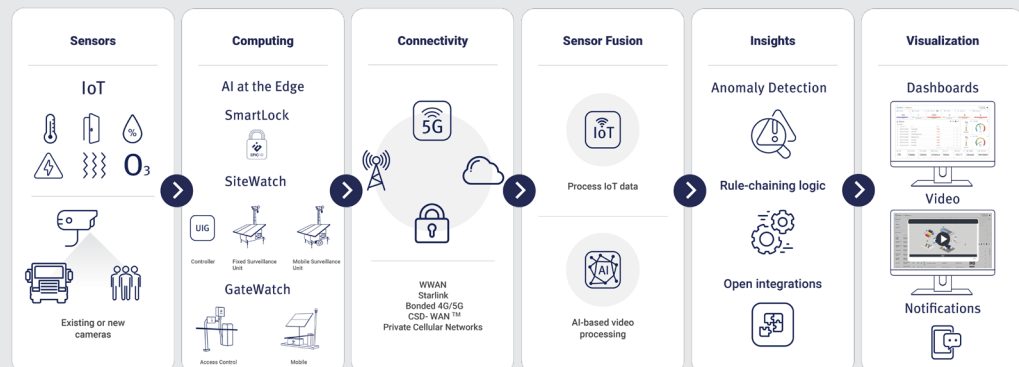

What Sets EPIC iO Apart

- Unbreakable Connectivity
- Cross Carrier Data Pooling
- Edge Computing, Device Agnostic
- Live video with instant AI Analytic
- Real Time, alerts, and Corrective responsive actions
- AI+IOT
- AI-Powered Rules Engine, Data Visualization
- Tailor-made Dashboard to Make Data-Backed Decisions
- Scalable, Integrated, Interoperable end-to-end Solution

Delivering tangible outcomes

END-TO-END AIoT SOLUTION
